DETAILED ACTION

The prior office action sent out May 5th, 2005 according to the history of this application was returned to the office due to an unknown address. Applicant submitted a change of address request prior to this mailing; therefore a new three-month statutory period starting from the mailing date of this office action will commence.

Specification

1. The disclosure is objected to because of the following informalities: On page 4 of the disclosure, (paragraph 6, line 4) "from other sources" is unclear and should be expanded on by giving examples. Also, on page 5 of the disclosure (1st paragraph, line 2-3) " The material thus produced can be processed by known techniques" should be further explained by giving examples of techniques to process the material.

Appropriate correction is required.

2. Claims 5-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim --should refer to other claims in the alternative only--, and/or--, cannot depend from any other multiple dependent claim--. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Application/Control Number: 09/936,534 Page 3

Art Unit: 1761

4. Claim 1 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With regards to claim 1, the word "typically" is not clear. In line 3, the word "comprising" is suggested to be removed.

5. With regards to claim 4, wrong Markush grouping format is used. The word "comprising" should be --consisting of-- Applicant should refer to MPEP section 803.02.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Application/Control Number: 09/936,534

Art Unit: 1761

Claims 1-4 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leo (U.S. Patent 5,419,283) in view of Van Loo et al. (U.S. Patent Number 6,500,805 B2) and Tomka (U.S. Patent Number 5,844,023). With regard to claim 1, Leo discloses in (Col 1, lines 28-31) an article for pets, specifically dogs and cats made from starch with a thermoplastic polymer. However, Leo does not show an article made from inulin. With regards to claim 2, Leo discloses in (col 1, line 33-35), an article preferably made from a thermoplastically processable starch with thermoplastic polymer. However, Leo does not show an article made from a thermoplastically processable inulin. With regards to claim 3, Leo discloses in (col 1, line 30) preferred articles made from biodegradable thermoplastic polymers. With regards to claim 4, Leo discloses in (col 2, lines 59-62), an article made from a degradable polymer consisting of starch. Van Loo et al. (U.S. Patent Number 6,500,805 B2) teaches a fructan composition preferably inulin as a functional food that can be administered in any food form including a pet food and the like. With regards to claim 9, Leo fails to disclose a thermoplastically processable inulin or mixtures of inulin. However, Tomka (U.S. Patent Number 5,844,023) discloses a thermoplastically processable starch with thermoplastic polymer. (Col. 15, lines 23-29). Therefore, it would have been obvious to one of ordinary skill in the art to modify Leo (U.S. Patent Number 5,419,283) with Tomka and Van Loo et al. because inulin is known for it's nutritional properties and beneficial effects on the digestive tract, effects on lipid metabolism and preventive effects against cancer, especially colon cancer in mammals.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adepeju Pearse whose telephone number is 571-272-8560. The examiner can normally be reached on Monday through Friday, 8.00am - 4.30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
